

RAMCLEAN 206

Specialty: Clear materials, PC, Acrylic
Extrusion and injection

RAMCLEAN 206 is a new product - a **Smart purging agent; Non-Corrosive, Non-Abrasive and Non-Toxic** is designed to clean transparent materials with working temperatures **230°C – 320°C**. PC, PP, PE, Acrylic, Clear PS.

Based on a proprietary formulation using ingredients that are **REACH** and **FDA** compliant.

Only prime materials are used in a unique and highly effective mix of physical agents (push, scrub & pressure) & chemical (react with the resin) - heat-activated foaming agent to clean hard-to-reach negative flow areas.

Easy to use - "AS IS" - no mixing or any further preparation is required. It is **safe to use and handle** and doesn't damage machinery after years of use providing continuous positive results.

Our specialists: preventive purging is highly recommended in keeping equipment clean. Frequently scheduled and shorter purges will be more effective than purging only when problems are observed.
